

std::invalid_argument

```
graph BT; cipher_error[cipher_error] --> std_invalid_argument[std::invalid_argument];
```

A diagram illustrating inheritance. A box labeled 'cipher_error' is at the bottom, and a box labeled 'std::invalid_argument' is at the top. A blue arrow points from the top of the 'cipher_error' box to the bottom of the 'std::invalid_argument' box, indicating that 'cipher_error' inherits from 'std::invalid_argument'.
